

Vehicle Safety Policy

Increasingly there is a requirement for Companies to formally identify the arrangements for the use of vehicles associated with their operations.

Pressure for such implementation comes from the Insurance Industry, the Health and Safety Executive (HSE), the National Health Service (NHS) and also the lobbying activities of organisations such as *Brake!* and *RoSPA*.

TGF offers services to prepare customised Policies to identify those areas of concern for Fleet Management including, but not limited to:

- Fitness (Drugs and Alcohol).
- Licences and Insurances.
- Vehicle roadworthiness.
- Driver training, working hours, Tachographs, etc.
- Route planning.
- Mobile Phones and navigational aids.

TGF are able to create a bespoke Vehicle Safety Policies for our Clients. These are initially created in a *Draft* format to allow for formal consultation over the contents and to ensure that they accurately reflect the Company operations.

TGF also offers a service to review existing Policies to ensure they reflect the operations of Client Companies within the complexities of the Health and Safety and traffic-related legal framework.

Please visit our Website to find out more about the **Health and Safety Services** we offer.
